Schedule of Fees for Hospitals and Ambulatory Surgical Centers	210
Schedule of Fees for Implantable Medical Devices	212

General Instructions

1. The Nebraska Workers' Compensation Court has established this Schedule of Medical and Hospital Fees pursuant to Section 48-120 of the Nebraska Workers' Compensation Act. The schedule establishes the maximum fees for reasonable medical, surgical, and hospital services provided pursuant to such section. In no event may a provider collect or attempt to collect any amount in excess of the fee established under this schedule.
2. This schedule will apply when payment is made on or after **July 1, 2006**, regardless of the date the service was provided.
3. Providers are to bill their regular charge for any such service, whether it is higher or lower than the fee established under this schedule.
4. This schedule includes three subsidiary schedules: the Schedule of Fees for Medical Services; the Schedule of Fees for Hospitals and Ambulatory Surgical Centers; and, the Schedule of Fees for Implantable Medical Devices. The medical schedule is further divided into seven sections: Evaluation and Management, Anesthesia, Surgery, Radiology, Pathology and Laboratory, Medicine, and Physical Medicine. These sections are for structural purposes only. Providers are to use the section that includes the services performed. Each of the seven sections is preceded by a set of ground rules specific to the use of that section.
5. For services not covered under this schedule, (e.g., prescription medication, prosthetic devices, durable medical equipment, and ambulance services,) the actual charge shall be paid in full unless the payor has evidence that the actual charge exceeds the regular charge for such service in similar cases.
6. When copies of medical and hospital records and information are requested, the maximum that must be paid is a \$20.00 handling fee plus 50¢ per page. When x-rays are requested and satisfactory reproductions (not images produced by copiers) are furnished in lieu of the original films, the maximum that must be paid for each sheet of duplicating film is \$7.50. These reproductions are not returnable.
7. Any insurance company, employer, or other payor who reduces charges from a provider according to this schedule must include a written explanation showing the provider of service, date(s) of service, charge for each service, amount of reimbursement for each service, and the reason for any payment which is lower than the charge. When payment for a service is denied, specific written reasons for the denial shall be provided on a service-specific basis. All explanations must identify the person or entity that determined the basis for the payment or denial, the person or entity ultimately responsible for payment, and a telephone number where further explanation can be obtained.
8. All charges for services performed by an independent medical examiner under Section 48-134.01 of the Nebraska Workers' Compensation Act and the Court's Rules of Procedure shall be paid in accordance with those Rules.
9. Informal resolution of disputes is available through the Court's Informal Dispute Resolution process. Any dispute regarding medical, surgical, or hospital services furnished, or to be furnished, under the Workers' Compensation Act, Section 48-120, may be submitted by the provider, employee, employer, or payor for informal resolution. The dispute may include the application of the Schedule of Medical and Hospital Fees. In addition, beginning July 14, 2006 if the provider and the workers' compensation insurer, risk management pool, or self-insured employer are unable to reach an agreement on the fees to be paid for such services they may agree to submit the dispute for informal dispute resolution and subsequent binding arbitration, if the dispute is not resolved in the informal dispute resolution process, or they may agree to submit the dispute directly to binding arbitration.

Schedule of Fees for Medical Services

Instructions

1. The medical schedule is divided into seven sections: Evaluation and Management, Anesthesia, Surgery, Radiology, Pathology and Laboratory, Medicine, and Physical Medicine. These sections are for structural purposes only. Providers are to use the section that includes the services performed. Each of the seven sections is preceded by a set of ground rules specific to the use of that section.
2. The term "physician" for workers' compensation purposes includes any person licensed to practice medicine and surgery, osteopathic medicine, chiropractic, podiatry, or dentistry. For purposes of this schedule, the term "provider" includes physicians and other licensed health care providers performing medical services within the scope of their respective licenses. All sections of the medical schedule may be used by any or all qualified providers acting within the scope of their respective licenses.
3. Coding for services listed in the medical schedule is to be in accordance with these instructions, the section ground rules, the guidelines and subsection "notes" as published in Physicians' Current Procedural Terminology, Fourth Edition (CPT 2006), copyright 2005, by the American Medical Association, and the National Correct Coding Initiative as established by Centers for Medicare and Medicaid services. Bills must be itemized by procedure code, date of service, and amount of charge.
4. The coded list of services with unit values in the medical schedule represents the relative cost of providing the services. The fee for a particular service under this schedule is determined by multiplying the listed unit value by the dollar conversion factor for the section in which the service is located. *Select this link for a list of conversion factors.*
5. Some of the services listed in the medical schedule are too unusual or variable in the nature of their performance to permit the assignment of a relative value. The schedule also includes "unlisted procedure" codes which are to be used if a service is provided that is not otherwise listed. The assigned unit value for these services is shown as 0.00 in the coded list of services. These services are not subject to the general rule for determining the fee under this schedule (unit value multiplied by conversion factor). Instead, these services are to be substantiated by a report to be submitted with the bill. If the service is substantiated by the report, then the actual charge shall be paid in full unless the payor has evidence that the actual charge exceeds the regular charge for such service in similar cases.
6. When modifier 22 (Unusual Services) is added to a code, then a report is to be submitted with the bill. If the unusual service is substantiated by the report, then the actual charge shall be paid in full unless the payor has evidence that the actual charge exceeds the regular charge for such service in similar cases.
7. When modifier 26 (Professional Component) is added to a code, the fee shall be a percentage of the total fee for the service under this schedule. The percentage is shown in the PC column for those services. The professional component includes the examination of the patient when indicated, performance or supervision of the service, interpretation and written report of the examination including results, and consultation with a referring health care provider.

8. When modifier TC (Technical Component—a Nebraska Specific Modifier) is added to a code, the fee shall be a percentage of the total fee for the service under this schedule. The percentage is shown in the TC column for those services. The technical component includes the charges for personnel, materials, supplies, space, and equipment.

Conversion Factors

SECTION	CONVERSION FACTOR
Evaluation and Management	\$54.07
Anesthesia	\$50.77
Surgery: Orthopedic Procedures (Orthopedic Procedures are those within the following code ranges: 20650–20694; 20900; 20902; 20930–20938; 20955–20973; 22100–22855; 23000–27894; 28400–28825; 29000–29999; 63001–63308)	\$120.03
All Other Procedures	\$75.89
Radiology	\$100.16
Pathology and Laboratory	\$100.39
Medicine	\$56.85
Physical Medicine	\$56.09

Anesthesia

Ground Rules

Coding for services listed in this section is to be in accordance with the medical schedule instructions, these ground rules, the guidelines and subsection "notes" as published in Physicians' Current Procedural Terminology, Fourth Edition (CPT 2006), copyright 2005, by the American Medical Association, and the National Correct Coding Initiative as established by Centers for Medicare and Medicaid services.

The procedure codes listed in this section are to be used only when anesthesia is administered by an Anesthesiologist or Certified Registered Nurse Anesthetist (CRNA). When anesthesia services are provided by a CRNA, practicing within the scope of the CRNA license, without the direct and responsible supervision of an anesthesiologist, the fee shall be 90 percent of the total fee for the procedure under this section.

1. MONITORED ANESTHESIA CARE

When an anesthesiologist or CRNA is required to participate in and be responsible for monitoring the general care of the patient during a surgical procedure but does not administer anesthesia, payment will be the same as if general anesthesia had been administered. Services provided shall include: performance of a preanesthetic examination and evaluation; prescription of the anesthesia care required; personal participation in, or medical direction of, the entire plan of care; and, the continuous physical presence of the anesthesiologist or CRNA. In addition, all institutional regulations pertaining to anesthesia services shall be observed, and all the usual services performed shall be furnished.

2. ANESTHESIA ADMINISTERED BY OTHER THAN AN ANESTHESIOLOGIST OR CRNA

- A. Anesthesia fees are not payable when local infiltration, digital block or topical anesthesia is administered by the operating surgeon or surgical assistants. Such services are included in the fee for the surgical procedure. See surgery ground rule 3.
- B. To report sedation with or without analgesia (conscious sedation) provided by a physician also performing the services for which conscious sedation is being provided, see CPT codes 99143–99145.

3. CALCULATION OF TOTAL ANESTHESIA VALUES

All anesthesia values are determined by adding a basic value, which is related to the complexity of the service, plus physical status modifying units (if any), plus time units. Fees are identical for general and regional anesthesia, as well as supplementation of local anesthesia.

- A. The basic unit value includes the usual preoperative and postoperative visits, the anesthesia care during the procedure, the administration of fluids and/or blood products, and the interpretation of noninvasive monitoring, including routine follow-up care and observation. No additional time units are allowed for recovery room observation and monitoring. A consultation fee is not payable to an anesthesiologist examining the patient prior to administering anesthesia to that patient.

When it is necessary to have a second attending anesthesiologist assist with the preparation and conduct of the anesthesia, these circumstances should be substantiated by a report. Such services shall have a basic value of 5 units plus time units.

Any procedure around the head, neck, or shoulder girdle, requiring field avoidance, or any procedure requiring a position other than supine or lithotomy, shall have a minimum basic value of 5 regardless of any lesser basic value assigned to such procedure in this section.

- B. When a physical status modifier is added to the procedure code, the physical status modifying units (unit values) as shown below shall be added to the basic value and time units. Under certain circumstances, when another established modifier(s) is appropriate, it should be used in addition to the physical status modifier.

Modifier	Unit Values
P1	0
P2	0
P3	1
P4	2
P5	3
P6	0

- C. Each 15 minutes, or significant fraction thereof (more than 7.5 minutes), of anesthesia time equals one unit. Actual time of beginning and duration of anesthesia may require documentation, such as a copy of the anesthesia record.

Anesthesia values are determined by adding the unit value to physical status modifying units (if any), plus time units. See Anesthesia Ground Rules.

For CPT code 01999 see Instruction 5 in the Schedule of Fees for Medical Services.

Surgery

Ground Rules

Coding for services listed in this section is to be in accordance with the medical schedule instructions, these ground rules, the guidelines and subsection "notes" as published in Physicians' Current Procedural Terminology, Fourth Edition (CPT 2006), copyright 2005, by the American Medical Association, and the National Correct Coding Initiative as established by Centers for Medicare and Medicaid services.

1. OPERATIVE REPORT AND BILLING

An operative report must be submitted to the payor with the itemized bill for a surgical procedure or service.

2. SURGICAL PROCEDURES WITH MORE THAN ONE CODE

More than one code is needed to describe some surgical procedures, usually a primary procedure plus an "add-on" procedure (e.g., 22554 with 22585). The fee for those surgical procedures will be the total of the fee for the primary procedure plus the fee for the add-on procedure(s).

3. SURGICAL PACKAGE CONCEPT

In addition to the operation itself, the relative value for a surgical procedure includes the services defined in the surgical package definition in the Physician's Current Procedural Terminology, Fourth Edition, (CPT 2006), copyright 2005, published by the American Medical Association. The surgical package includes routine follow-up care for the number of days listed in the column headed "FUD" in the coded list of services and includes hospital discharge day management. To report a postoperative follow-up visit for documentation purposes only, use 99024.

- A. **SURGERY DURING FOLLOW-UP PERIOD:** When an additional surgical procedure is performed during the stated follow-up period, related to the previous procedure but not an actual part of it, the fee for the additional procedure will be 50 percent of the total fee for the additional procedure under this schedule. Follow-up periods will continue concurrently to their normal end.
- B. **CONCURRENT SERVICES OF TWO OR MORE PHYSICIANS:** Concurrent services by a physician other than the surgeon may be warranted prior to, during, or after a surgical procedure. The physician providing the concurrent service is to identify the service with the appropriate code. The fee for the concurrent service shall be the fee established by this schedule and is in addition to the fee for the surgical procedure.
- C. **SURGERY AND FOLLOW-UP CARE BY DIFFERENT PHYSICIANS:** Fees for surgical care and postoperative care are limited to the total fee for the surgical procedure under this schedule, using the surgical package concept. A physician performing the surgical procedure only should add modifier 54 to the code and a physician performing postoperative care only should add modifier 55. If the physicians have agreed upon a percentage distribution of the total fee for the procedure and documentation of that agreement is provided, then fees shall be determined in accordance with the percentage agreed upon. In the absence of a prior agreement, the fee to the surgeon will be 85 percent of the total fee for the procedure, and the fee to the physician providing postoperative care will be 15 percent of the total fee for procedure.
- D. **TRANSFER OF CARE DURING FOLLOW-UP PERIOD:** When the patient is transferred from one physician providing follow-up care only (modifier 55) to another physician, the total fees for follow-up care shall not exceed the fee that would have been applicable to a sole physician providing follow-up care only. If the physicians have agreed upon a percentage distribution of the total fee for follow up care only and documentation of that agreement is provided, then fees shall be determined in accordance with the percentage agreed upon. In the absence of an agreement, the fee for each physician will be a percentage of the total fee for

follow up care only based on the number of days of care provided as it relates to the total number of days in the follow-up period indicated in the coded list of services.

4. UNUSUAL PREOPERATIVE SERVICES

- A. INITIAL CONSULTATION: When the preoperative visit is an initial consultation, the appropriate evaluation and management service may be billed. The fee will be in addition to the fee for the surgical procedure.
- B. SURGICAL PROCEDURES: The fee for a surgical procedure performed during the immediate preoperative period, not part of the primary procedure (e.g., myelography prior to laminectomy, bronchoscopy prior to chest surgery), is the fee established by this schedule and is in addition to the fee for the surgical procedure.
- C. When modifier 57 is added to an evaluation and management code the fee for the evaluation and management service is in addition to the fee for the surgical procedure.

5. MULTIPLE OR BILATERAL PROCEDURES RULE

This rule applies when modifiers 50 (Bilateral Procedure) or 51 (Multiple Procedures) are used in accordance with CPT 2006.

- A. FEE COMPUTATION: When multiple related procedures adding significant time or complexity are provided at the same operative session and through the same incision, the total fee shall be the highest fee plus 50 percent of the fee for each additional procedure. When multiple procedures unrelated to the primary procedure are provided at the same operative session through separate incisions and/or involving different parts of the body, then the total fee shall be the highest fee plus 75 percent of the fee for each additional procedure.
- B. FOLLOW-UP PERIOD: When multiple procedures are performed during the same treatment session only the longest follow-up period applies.

6. MODIFIERS AFFECTING PAYMENT

Modifier 47 (Anesthesia by Surgeon)

When modifier 47 is used, the services shall be substantiated by a report to be submitted with the bill. When the service is substantiated by the report, the actual charge for the anesthesia service shall be paid in full unless the payor has evidence that the actual charge exceeds the regular charge for such service in similar cases. Note: This modifier may not be used with anesthesia procedure codes 00100-01999.

Modifier 62 (Two Surgeons)

When modifier 62 is used, the total fee for the procedure under this schedule shall be increased by 25 percent. If the physicians have agreed upon a percentage distribution and documentation of that agreement is provided, then the fees shall be in accordance with the percentage agreed upon. In the absence of a prior agreement, the total fee for the procedure will be divided equally between the two surgeons.

Modifier 80 (Assistant Surgeon)

When an assistant surgeon fee is payable, the fee shall be 20 percent of the fee for the procedure under this schedule.

Modifier 81 (Minimum Assistant Surgeon)

When a minimum assistant surgeon fee is payable, the fee shall be 10 percent of the fee for the procedure under this schedule.

Modifier 82 (Assistant Surgeon when qualified resident surgeon not available)

Assistant surgeon fees are not payable when a qualified resident surgeon assists or is available to assist at surgery. When assistant surgeon fees are payable, the fee shall be 20 percent of the fee for the procedure under this schedule.

Physical Medicine

Ground Rules

Coding for services listed in this section is to be in accordance with the medical schedule instructions, these ground rules, the medicine guidelines and subsection "notes" for the physical medicine and rehabilitation, osteopathic manipulative treatment, and chiropractic manipulative treatment subsections as published in the Physician's Current Procedural Terminology, Fourth Edition (CPT 2006), copyright 2005, by the American Medical Association, and the National Correct Coding Initiative as established by Centers for Medicare and Medicaid services.

The procedure codes in this section shall apply when the listed services are performed by the following providers, practicing within the scope of their respective licenses: physicians; licensed physical therapists; licensed physical therapy assistants; licensed occupational therapists; and, licensed occupational therapy assistants.

Services may not be provided by a physical therapist or assistant or by an occupational therapist or assistant unless there is a written order from a physician.

1. SERVICES DURING FOLLOW-UP PERIOD

The services listed in this section are not considered routine follow-up care after surgery. See surgery ground rule
3. Fees are in addition to the fee for the surgical procedure.

2. HOME VISITS

When services listed in this section are provided in a patient's home, add 50 percent to the fee for the service under this schedule. The need for home therapy should be substantiated by a report to be submitted with the bill.

3. MULTIPLE SERVICES RULE

This ground rule will apply when multiple services listed in this section are performed on one day. Evaluation and management services performed on a day when services listed under this section are performed by the same physician are also subject to this rule. Except for physical performance tests or measurements (CPT code 97750) and work hardening/conditioning services (CPT codes 97545 and 97546), each service or unit of service will be considered one service. Each 15 minutes is a unit of service when the CPT code description includes the phrase "each 15 minutes." All physical performance tests or measurements, coded 97750, performed on one day shall be considered one service. All work hardening services, coded 97545 and 97546, provided on one day shall also be considered one service.

To calculate the total payment for any one day, first determine the fee under this schedule for each service or unit of service. Fees for all services performed on one day and subject to this rule will be limited to the three highest fees plus 50 percent of the fee for each additional procedure or service. **Note:** If the provider's actual charge is 50 percent or less than 50 percent of the fee established under this schedule for a service or unit of service, the fee will be the provider's actual charge.

4. WORK HARDENING/CONDITIONING

CPT codes 97545 and 97546 are to be used only when services are provided in conjunction with a written, goal-oriented treatment program. Any evaluation needed to assess the employee's abilities prior to starting a treatment program shall be billed using the appropriate code from this section and shall be paid separately.

Work hardening is a highly-structured, goal-oriented, individualized treatment program designed to maximize the employee's ability to return to work. Work hardening programs are interdisciplinary in nature and use real or simulated work activities designed to restore physical, psychosocial, and vocational functions. Work hardening addresses the issues of productivity, safety, physical tolerances, and worker behaviors.

Work conditioning is a work-relevant, intensive, goal-oriented treatment program specifically designed to restore the employee's systemic, neuromusculoskeletal function (strength, endurance, movement, flexibility, and motor control), and cardiopulmonary functions. The objective of a work conditioning program is to restore physical health and function so the employee can return to work.

Work hardening/conditioning programs require a written plan of treatment. Medical services that are required and not included in the written plan shall be paid in addition to the payment for the program.

Schedule of Fees for Hospitals and Ambulatory Surgical Centers

Instructions

This schedule applies to charges made by a hospital for inpatient, outpatient, and other services provided by the hospital or any facility operating under the license of the hospital. In addition, it applies to charges made by facilities licensed as ambulatory surgical centers.

1. PROFESSIONAL SERVICES

Charges by a hospital or ambulatory surgical center for the professional component of medical or surgical services provided by a physician or other licensed health care provider are subject to the Schedule of Medical Fees, rather than this schedule, and the maximum fee for such services shall be determined in accordance with the Medical Schedule.

2. IMPLANTABLE MEDICAL DEVICES

Hospitals and ambulatory surgical centers shall be separately reimbursed for certain implantable medical devices in accordance with the Implantable Medical Devices Schedule. Charges by a hospital or ambulatory surgical center for implantable medical devices not subject to the Implantable Medical Devices Schedule shall be reimbursed in accordance with Instruction 3 of this schedule.

3. OTHER SERVICES

All charges by a hospital or ambulatory surgical center for services other than professional services and other than implantable medical devices reimbursed separately in accordance with the Implantable Medical Devices Schedule shall be reimbursed in accordance with this Instruction.

Tier I: All hospitals and all licensed ambulatory surgical centers located in or within 20 miles of a Nebraska city of the metropolitan class or primary class and all hospitals and ambulatory centers located outside the boundaries of the State of Nebraska shall be Tier I facilities. If payment is made to a Tier I facility within 60 days of receipt of the bill, the fee under this schedule shall be 80 percent of billed charges. If payment to a Tier I facility is made more than 60 days after receipt of the bill, the fee under this schedule shall be 85 percent of billed charges.

Tier II: Hospitals with 51 or more licensed beds and not classified under Tier I and licensed ambulatory surgical centers located in or within 20 miles of a Nebraska city of the First Class shall be Tier II facilities. If payment is made to a Tier II facility within 60 days of receipt of the bill, the fee under this schedule shall be 90 percent of billed charges. If payment to a Tier II facility is made more than 60 days after receipt of the bill, the fee under this schedule shall be 92.5 percent of billed charges.

Tier III: Hospitals with 50 licensed beds or less and not classified under Tier I, all critical access hospitals, and all licensed ambulatory surgical centers not classified under Tier I or Tier II shall be Tier III facilities. If payment is made to a Tier III facility within 60 days of receipt of the bill, the fee under this schedule shall be 94 percent of billed charges. If payment to a Tier III facility is made more than 60 days after receipt of the bill, the fee under this schedule shall be 96 percent of billed charges.

A bill submitted electronically is presumed to have been received on the date of the electronic verification of receipt by the payor or the payor's representative. A bill submitted by mail is presumed to have been received five business days after the bill has been placed in the United States mail with first-class postage prepaid.

A payment made electronically is presumed to have been made on the date of the electronic verification of receipt by the facility or the facility's representative. A payment made by mail is presumed to have been made five business days after the payment has been placed in the United States mail with first-class postage prepaid.

Select this link for a list of Nebraska hospitals and ambulatory centers and their classifications.

Schedule of Fees for Implantable Medical Devices

Instructions

This schedule applies to charges for implantable medical devices by a hospital, ambulatory surgical center, physician, or other provider when the total charges for implantable medical devices utilized during one stay equal or exceed \$10,000.

1. FEE COMPUTATION

When the total charges for implantable medical devices utilized during one stay equal or exceed \$10,000 **and** the total cost of all such devices equals or exceeds \$10,000, then the fee under this schedule will be the total cost of all such devices plus 25 percent. If the total cost of all such devices is less than \$10,000, then the fee will be determined in accordance with the Hospital or Medical Schedule as applicable.

2. IMPLANTABLE MEDICAL DEVICE

For purposes of this schedule, an implantable medical device is an instrument, apparatus, implement, machine, contrivance, implant, or other similar related article, including a component part or accessory, which is partly or totally inserted into the human body or a natural orifice and is intended for permanent placement in the body, and surgical or medical procedures are used to insert or apply such device and surgical or medical procedures are necessary to remove such device.

3. COST

For purposes of this schedule, the cost of an implantable medical device is the cost of procuring the device from a third party vendor, including any sales tax, shipping and handling fees, and other expenses related to the procuring of the device.

4. DOCUMENTATION

If implantable medical devices are not separately identified, an itemized list of devices shall be provided upon request of the payor. If evidence of the cost of implantable medical devices is not provided, verification of the cost shall be provided upon request of the payor.
